

Auction & Mail Bid Prices Realized for Bust Half Dollars 1794 – 1839

*Rarity 3+ to Rarity 8 Die Varieties,
Overdates & Other Popular Varieties, Proofs,
Mint Errors & Patterns, Countermarks,
Contemporary Counterfeits, and
Condition Census Specimens for All Die Varieties*

Edited by Stephen J. Herrman, ANA, BHNC, JRCS

Editor's Notes

According to **United States Early Half Dollar Die Varieties 1794-1836**, Fourth Edition (2005) by Donald L. Parsley, 558 different combinations of obverse and reverse dies were prepared for the striking of United States Bust half dollars. However, 1795 O.118 is presently unknown, and possibly does not exist. Including the recent discovery of 1806 O.130 in February 2007 and the experimental, proof-only "Crushed Lettered Edge" (CLE) pieces dated 1833, 1834, and 1835, the total number of known die marriages now stands at 561.

Currently, 108 die marriages are known for Pre-Turban Bust half dollars (1794-1807), 42 are of the Flowing Hair Type (1794-1795), 4 are of the Draped Bust Type, Small Eagle Reverse (1796-1797), and 62 are of the Draped Bust Type, Heraldic Eagle Reverse (1801-1807). 453 die marriages are known for the Capped Bust half dollars (1807-1836).

The *Auction & Mail Bid Prices Realized for Bust Half Dollars 1794-1839 (AMBPR)* consists of auction, mail bid, and verified fixed price list sales results for R3+ to R8 die varieties, overdates & popular varieties, proofs, mint errors & patterns, countermarks, and contemporary counterfeits. Over 12,000 auction records (see Auction Summary) are listed in this revision.

Please refer to **Coin World's Coin Values**, **Numismatic News Coin Market**, **PCGS Price Guide**, or other sources to obtain estimated retail pricing information for circulated grades of the "common" R1 to R3 varieties, as the *AMBPR* covers prices realized for potential condition census specimens only.

Below is the rarity table listed in the 4th edition with the editor's comments on expected premiums.

Rarity	Verbal Description	No. Known	Editor's Comments on Expected Premiums
R8	Unique or nearly so	1 to 3	A photograph of the specimen will suffice for most
R7	Extremely Rare	4 to 12	A nice R7 or a new car (an 1817/4 or a new house)
R6	Very Rare	13 to 30	Command a heavy to extremely heavy premium
R5	Rare	31 to 80	Command a moderate to heavy premium
R4	Very Scarce	81 to 200	Command a slight to moderate premium
R3	Scarce	201 to 500	Seldom command a premium based on rarity
R2	Slightly Uncommon	501 to 1000	Do not command a premium based on rarity
R1	Common	over 1000	Do not command a premium based on rarity

The most current rarity ratings estimates released by the Bust Half Nut Club (BHNC) are used in the *AMBPR* (see Current Rarity Rating Estimates). Based upon continuing research, the BHNC has provided periodic updates (Capped Bust only in 1994, Capped Bust only in 1998, and both Pre-Turban and Capped Bust in 2004). Starting in 1998, the BHNC began providing plus and minus designations for the R3 to R7 rarity levels. This provides very important additional information about the availability of a variety.

Rarity	No. Known	Rarity	No. Known	Rarity	No. Known	Rarity	No. Known	Rarity	No. Known
R3-	401-500	R4-	161-200	R5-	64-80	R6-	25-30	R7-	10-12
R3	301-400	R4	121-160	R5	47-63	R6	19-24	R7	7-9
R3+	201-300	R4+	81-120	R5+	31-46	R6+	13-18	R7+	4-6

Many Bust half dollar die marriages have significant die states. Die state progression is a fascinating field of study for advanced collectors. Please note that the rarity of a die marriage is usually considered to be the same as the rarity of its most common die state. For example, the 1808 O.102 die marriage has two listed die states—O.102 R5 and O.102a R2. Hence, the die marriage is considered to be R2. However, expect to pay a healthy premium to acquire the rare, early die state.

The *AMBPR* is kept up-to-date and as accurate as possible. However, there may be a few original catalogue descriptions and/or official prices realized lists for past auctions which are not currently available to the editor.

If you have access to the catalogue and/or official prices realized for any auction or mail bid sale held within the past ten years for which the information in the *AMBPR* is incomplete, please contact the editor. A photocopy (or the original, if you no longer need it) of just the Bust half dollar information would be greatly appreciated.

The *AMBPR* is published semi-annually at the end of March and end of September. Please address questions and/or comments to the editor at Herrman102@aol.com.

\$2.50 is donated to the John Reich Collectors Society for each copy sold. Thank you for supporting this project.

Editor's Notes for the Spring 2011 Revision, Number 38

A number of known die states which are not listed in the 4th edition (2005) of **United States Early Half Dollar Die Varieties 1794-1836** by Donald L. Parley are listed in this revision in italics. Early die states, also known as "primes", are designated with a single quotation mark after the die marriage number, e.g. 1809 O.110'. Later die states are designated with an 'a' or 'b' following the die marriage number. Rarity rating estimates for these varieties are the opinion of the editor (not the BHNC or Don Parsley), and are designated with a question mark following the rarity rating number. Time will tell how rare these die states really are.

1802 O.101'a'	1805 O.102'a'	1805 O.109'b'	1805 O.112'a'	1805 O.113'b'	1806 O.102'a'	1806 O.104'
1806 O.105'b'	1806 O.111'b'	1806 O.116'	1806 O.123'	1807 O.109'b'	1807 O.114'a'	1809 O.110'
1809 O.111'	1810 O.101'	1811 O.107'	1812 O.104'b'	1813 O.103'a'	1814 O.107'	1817 O.103'b'
1817 O.105'a'	1818 O.104'b'	1819 O.107'b'	1822 O.105'a'	1823 O.103'a'	1824 O.113'	1826 O.108'
1826 O.110'a'	1826 O.113'b'	1826 O.114'	1826 O.115'a'	1827 O.136'	1828 O.106'a'	1829 O.114'
1830 O.110'a'	1831 O.111'					

Starting with the Spring 2003 revision, probable condition census specimens sold at auction have been recorded for all die varieties. For common R1 to R3 varieties, the information may be incomplete, as auction records prior to March 2002 have not been thoroughly reviewed.

To help control the length of the AMBPR, the following rules are used to roll off older information. Exceptions have been made where warranted.

- 1) R7 and R8 die varieties are not rolled off the list
- 2) R6 die varieties are rolled off the list after 15 years
- 3) R5+ die varieties are rolled off the list after 12.5 years
- 4) R4 through R5 die varieties are rolled off the list after 10 years
- 5) R3 through R4- die varieties are rolled off the list after 7.5 years
- 6) R1 and R2 die varieties are rolled off the list after 5 years
- 7) Fixed price list results are rolled off the list after 5 years

Lines which are **bolded** in the AMBPR list contain information for the die marriages. Subsequent lines contain auction records and information for the die states.
